Make Skills and Competencies Count for Success.

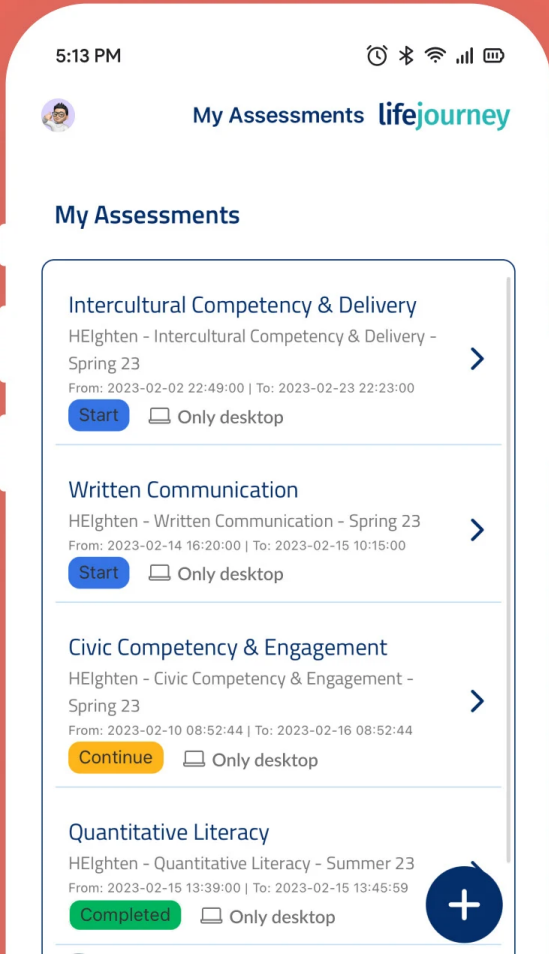

“Through Territorium’s CLR, we are able to gather the evidence we need for validating student competencies and skills and empower our students to articulate their capabilities far greater than what a transcript can do.”

Dr. Solomon Alao
Assistant Vice President

Intelligent test authoring, delivery, and monitoring with a suite of identity verification tools that guarantee results credibility.

Over 4 million tests are delivered annually using EdTest.Ai in 15 countries!

Test Creation

- Passages
- Questions
 - Multiple formats
- Forms
 - Surveys
 - Tests
- Tests
- QTI Import

The screenshot shows the 'Questions' management page in the lifejourney system. The left sidebar contains navigation options: Marketplace, Administrations, Dashboard, Learning Experiences, Orders, Proctor, Assessments (Tests, Forms, Questions), Passages, CLR (Dashboard, Learning Outcomes, Achievements, Associations, Integrations), and Mode: Admin. The main content area displays a table of questions with columns for Name, Question Type, Created at, and Actions. A search bar is located at the top of the table.

Name	Question Type	Created at	Actions
MathEquationsExample	Single choice	2023-02-24 03:08:15	[Eye] [Edit] [Delete] [Duplicate]
QBreak	Single choice	2023-03-14 20:59:38	[Eye] [Edit] [Delete] [Duplicate]
S2Q1	Single choice	2023-03-09 21:58:01	[Eye] [Edit] [Delete] [Duplicate]
S2Q2	Single choice	2023-03-09 22:01:33	[Eye] [Edit] [Delete] [Duplicate]
S3Q3	Blank	2023-03-10 03:42:36	[Eye] [Edit] [Delete] [Duplicate]
S3Q4	Dropdown	2023-04-25 22:59:32	[Eye] [Edit] [Delete] [Duplicate]
WH1	Single choice	2023-02-24 02:41:07	[Eye] [Edit] [Delete] [Duplicate]
WH2	Single choice	2023-02-24 02:42:29	[Eye] [Edit] [Delete] [Duplicate]
WH3	Multiple choice	2023-02-24 02:47:47	[Eye] [Edit] [Delete] [Duplicate]
WH4	Dropdown	2023-02-24 02:55:01	[Eye] [Edit] [Delete] [Duplicate]

The screenshot shows the 'Edit form' dialog box in the lifejourney system. The dialog is titled 'Edit from' and contains the following fields: Form name (WH-form1), Time duration (00:10:00), Form type (Test), Shuffle sections (unchecked), and a 'Delete section' section with fields for Name (Main), Order (1), and Set time duration (00:10:00). The dialog has 'Cancel' and 'Save' buttons.

The screenshot shows the 'Edit test' interface in the lifejourney system. It features two rich text editors: 'Description' and 'Instructions'. The 'Description' field contains the text: 'This is a demo test created to show some of the LifeJourney Assessments tools'. The 'Instructions' field contains the text: 'Answer correctly the questions'. Both editors have a toolbar with various formatting options and 'Cancel' and 'Save' buttons.

EdTest.ai

ID Verification with Multi-Factor Authentication

Student identity verification and exam access is provided within 60 seconds using email, geolocation, SMS, and facial & voice recognition for security and reliability.

EdTest.ai

Lockdown Browser to Prevent Access to Other Sites

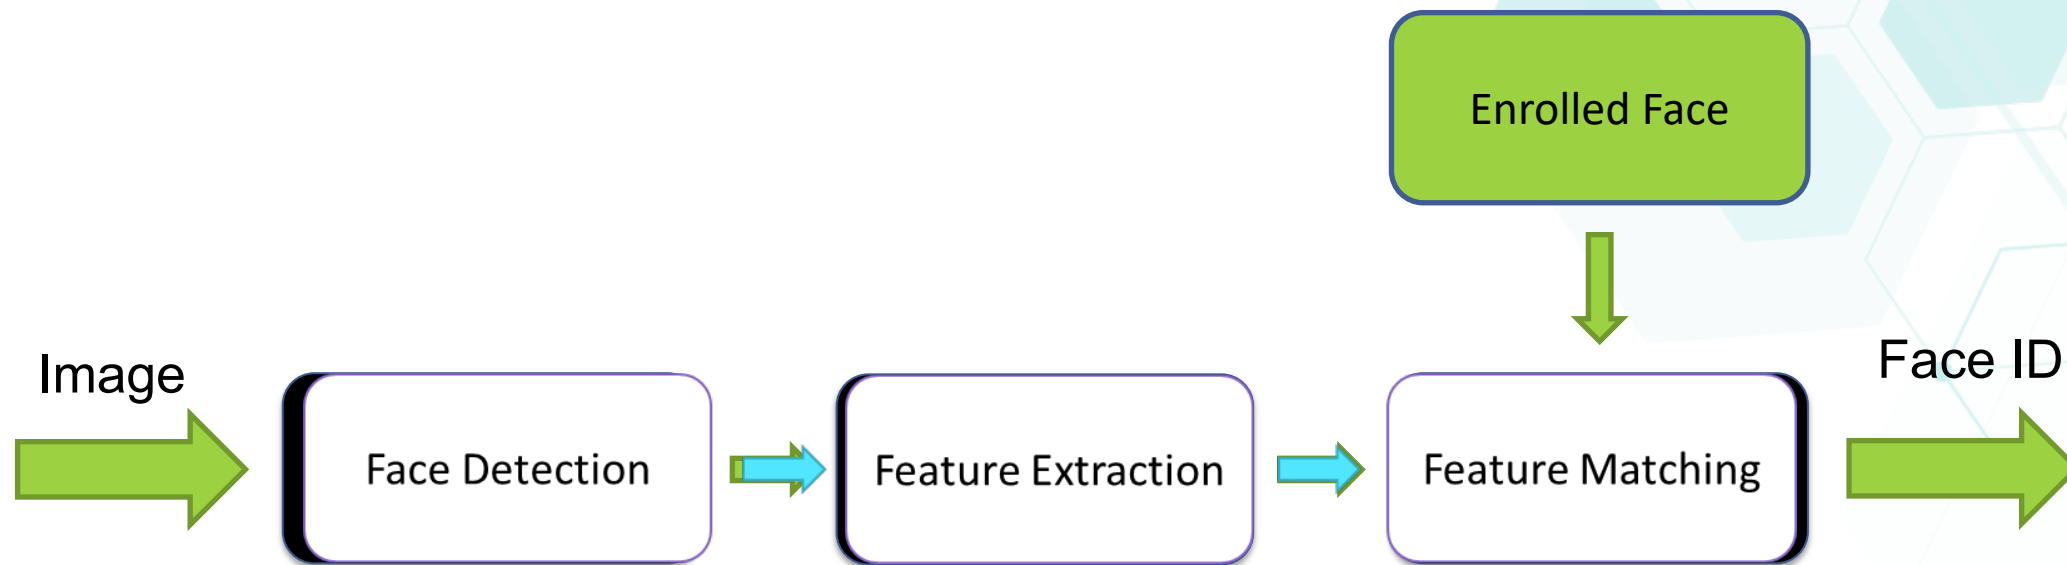

Protect assessment quality through browser lockdown to prevent multiple screens, cut/paste, printing, and communication protocols that could allow learners to retrieve answers through search engines or communication with other students.

EdTest.ai

Continuous Facial Recognition to Detect Anomalies

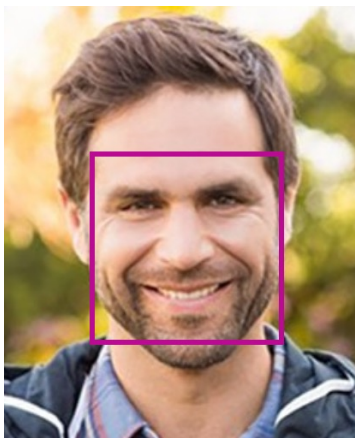

Learners may complete assessments securely 24/7/365 through web cameras and AI-powered video and audio detection for voice and facial verification as well as ongoing monitoring of the testing environment.

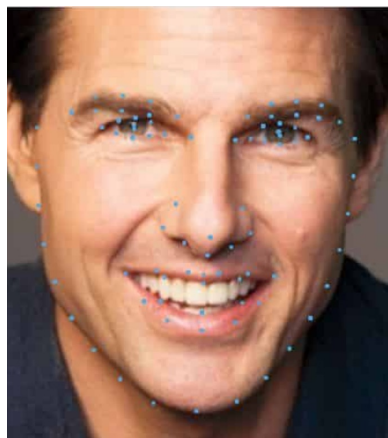

Face Recognition

- **1:1 Verification**
- **1:N Identification**
- Up to 75 million users in recognition database

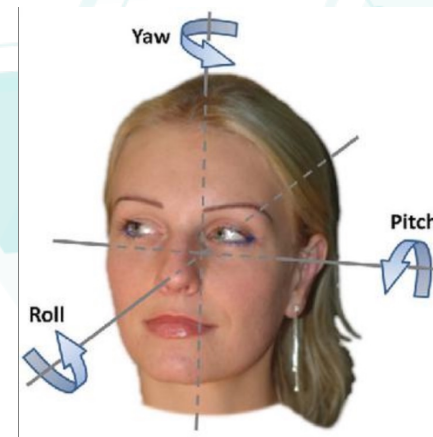

Face Recognition

Face detection

Landmark detection

Pose Estimation

Antispoofing/Liveness detection

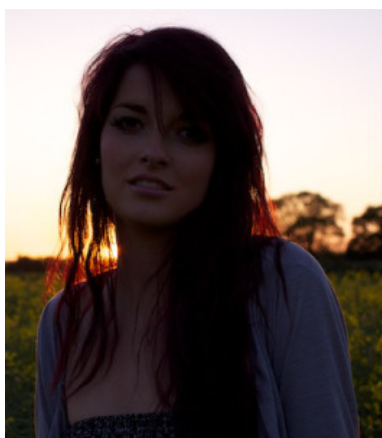

Image quality assessment

Anomaly detection

<u>Anomalies</u>	Description	Recording Details
Accompanied <input type="checkbox"/>	System detects other faces that may be photography or people around you or if you are with another person.	As needed
Suspicious object detection	Refers to objects that should not appear in the visual field: cell phones, calculators, books, among other various objects.	As needed
Not detected	Occurs when it is not possible to identify the user, it may occur because the person is absent, crouched down, or the activated camera does not appear.	As needed
Unrecognized	When it isn't possible to analyze the user's image, it can occur when the person has their head lowered, or because they have glasses or movement, or because they do not match the person in the original photo.	As needed
<u>Evidence</u>		
Recognized	Refers to the validation performed with respect to the initial image and the image captured during the execution of the tests.	~30 seconds
Audio Analysis	Permanently stored audio recordings.	~30 seconds
Video	Permanently stored video recordings.	~ every minute

EdTest.ai

Real Time Recording and Communication Between Test Taker & Remote Proctor

EdTest.ai enables proctors - in as much as a 1:500 ratio - to view real-time recordings of students and triggered potential test-taking anomalies. In addition, all direct interactions between proctor and student are recorded as well.
