

territorium E-Proiciency Profile

with Official Content from ETS

Demonstrate higher education general education foundational skills

The Territorium E-Proiciency Profile with Official Content by ETS measures core components of a general education program. Time efficient and cost effective, the E-Proiciency Profile ensures basic promises of higher education to the learner and program evaluation alike.

The Territorium E-Proiciency Profile is a single exam that assesses college-level skills in:

- Reading
- Writing
- Critical Thinking
- Mathematics

territorium

Designed to measure essential academic skills developed through general education courses (rather than the subject-specific knowledge specifically taught within those courses), E-Proficiency Profile questions include all subject-relevant content knowledge necessary to answer each question.

Provide Clarity to Accountability

Measure individual and cohort performance in the moment, through programmatic approach, and longitudinally across years and classes

Benchmark Institutional Performance

Benchmark performance with comparative data from more than 350 institutions and 600,000 students nationwide.

Support Accreditation

Meet ongoing requirements for accreditation with data that validates performance and institutional funding.

Fuel Continuous Improvement

Evaluate, reflect, and adjust teaching and learning practices based upon learner- and cohort-level level data.

Efficient Delivery & Scoring

The E-Proficiency Profile is a two-hour exam with 2 sections (54 questions in each section, 108 questions total). The exam may be administered either in a single 2-hour testing session or in two separate 1-hour testing sessions. A score and proficiency profile rating may be provided immediately upon completion.

A one-hour abbreviated version is also available for institutions maximizing student availability within limited institution assessment delivery window

On-Demand Assessment Delivery Mechanism:

Secure remote delivery and available AI proctoring service meet the availability needs of learners and validity criteria of institutions.

Responsive to Conditions of Learning Needs:

Be it extended time or screen reader compliance of other accessibility factors, the E-Proficiency Profile can be delivered according to individual learning needs.

Local Configuration for Impactful Research:

Attach a custom survey to any E-Proficiency Profile to collect student data necessary for mining trends specific to the institution, program, or experience.
