Personalized Assessment Delivery and Remote Proctoring Solution

Custom Test Development and Delivery Platform

The assessment engine of EdTest.ai provides the ability to develop localized question banks, multiple form rotations, and extensive question and assessment configurations to meet institution, program, and personalized assessment needs. Features like random question order, extensive question types, and variable response parameters ensure custom assessments are both "of" and "for" learning.

Improved confidence in online test results.

EdTest.ai feeds institutional confidence in assessment validity and results integrity. Through features like real-time anomaly detection and environmental restrictions, EdTest.ai preserves assessment credibility better than students testing directly in a classroom.
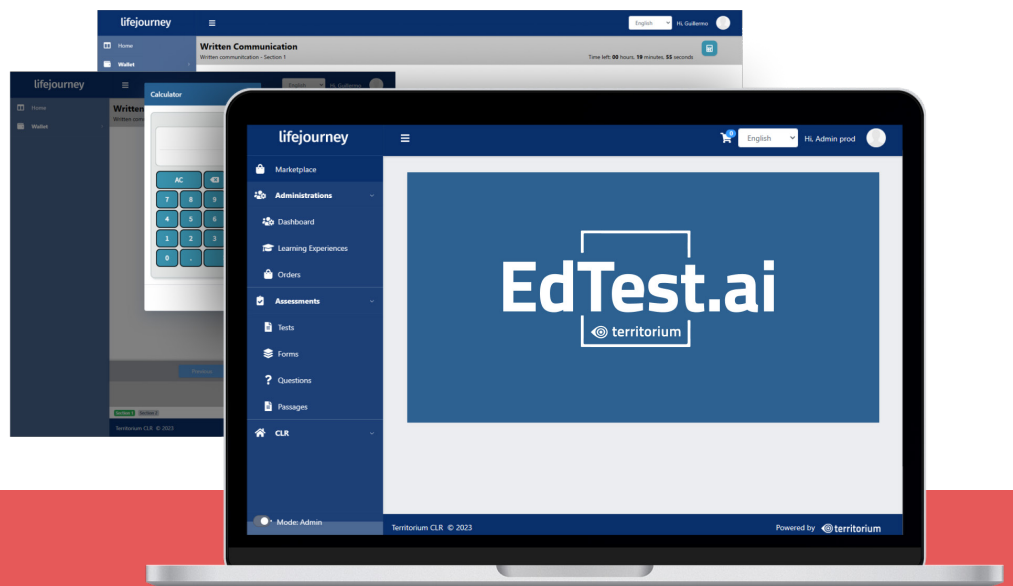

Preserve academic performance validity while maintaining a secure remote testing environment.

Whether you're offering online exams remotely or in a short-staffed supervisory lab setting, EdTest.ai offers intelligent remote proctoring to verify and maintain rigorous assessment process protocols.

Microsoft

Powered by Microsoft Cognitive Science technology.

Over 4 million tests delivered annually in 15 countries.

Comprehensive Features of Edtest.ai:

ID Verification with Multi-Factor Authentication

Student identity verification and exam access is provided within 60 seconds using email, geolocation, SMS, and facial & voice recognition for security and reliability.

Continuous Facial Recognition to Detect Anomalies

Learners may complete assessments securely 24/7/365 through web cameras and AI-powered video and audio detection for voice and facial verification as well as ongoing monitoring of the testing environment.

Real Time Recording and Communication Between Test Taker & Remote Proctor

EdTest.ai enables proctors - in as much as a 1:500 ratio - to view real-time recordings of students and triggered potential test-taking anomalies. In addition, all direct interactions between proctor and student are recorded as well.
Lockdown Browser to Prevent Access to Other Sites

Protect assessment quality through browser lockdown to prevent multiple screens, cut/paste, printing, and communication protocols that could allow learners to retrieve answers through search engines or communication with other students.

Learning Management System (LMS) Integration

With no additional passwords or logins necessary, learners can launch a proctored exam within the LMS like any other assignment and obtain support without having to leave the exam window.

Protect your bottom line and accurately estimate overall testing costs.

EdTest.ai is priced simply via a flat-rate cost per student exam. Institutions may produce the highest-quality proctoring services while saving time and money.

EdTest.ai is part of the Territorium LifeJourney Toolkit. Explore all of our products at Territorium.com.
