

## Going beyond the transcript in the skills-first economy

Territorium's skills-first technology blends an industry-leading **comprehensive learner record (CLR)** with a **learning and employment record (LER)** to create an integrated solution that supports both individual and organizational success.

Territorium's **Comprehensive Learner Record** captures learning within and beyond traditional classroom settings. From the internship to the extra-curricular event, it creates a granular record of **verifiable competencies and skills**.

### The Comprehensive Learner Record includes:

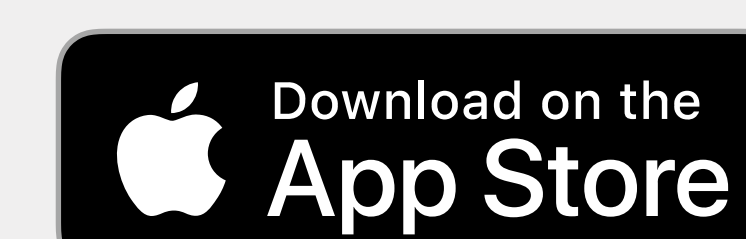

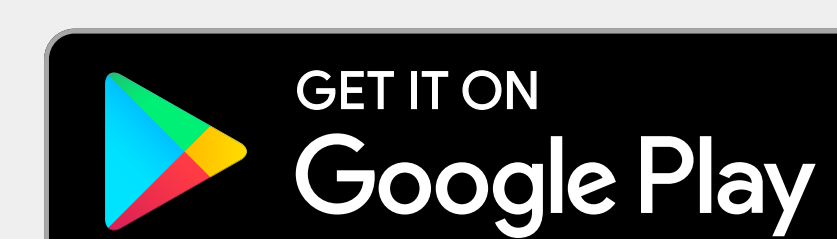

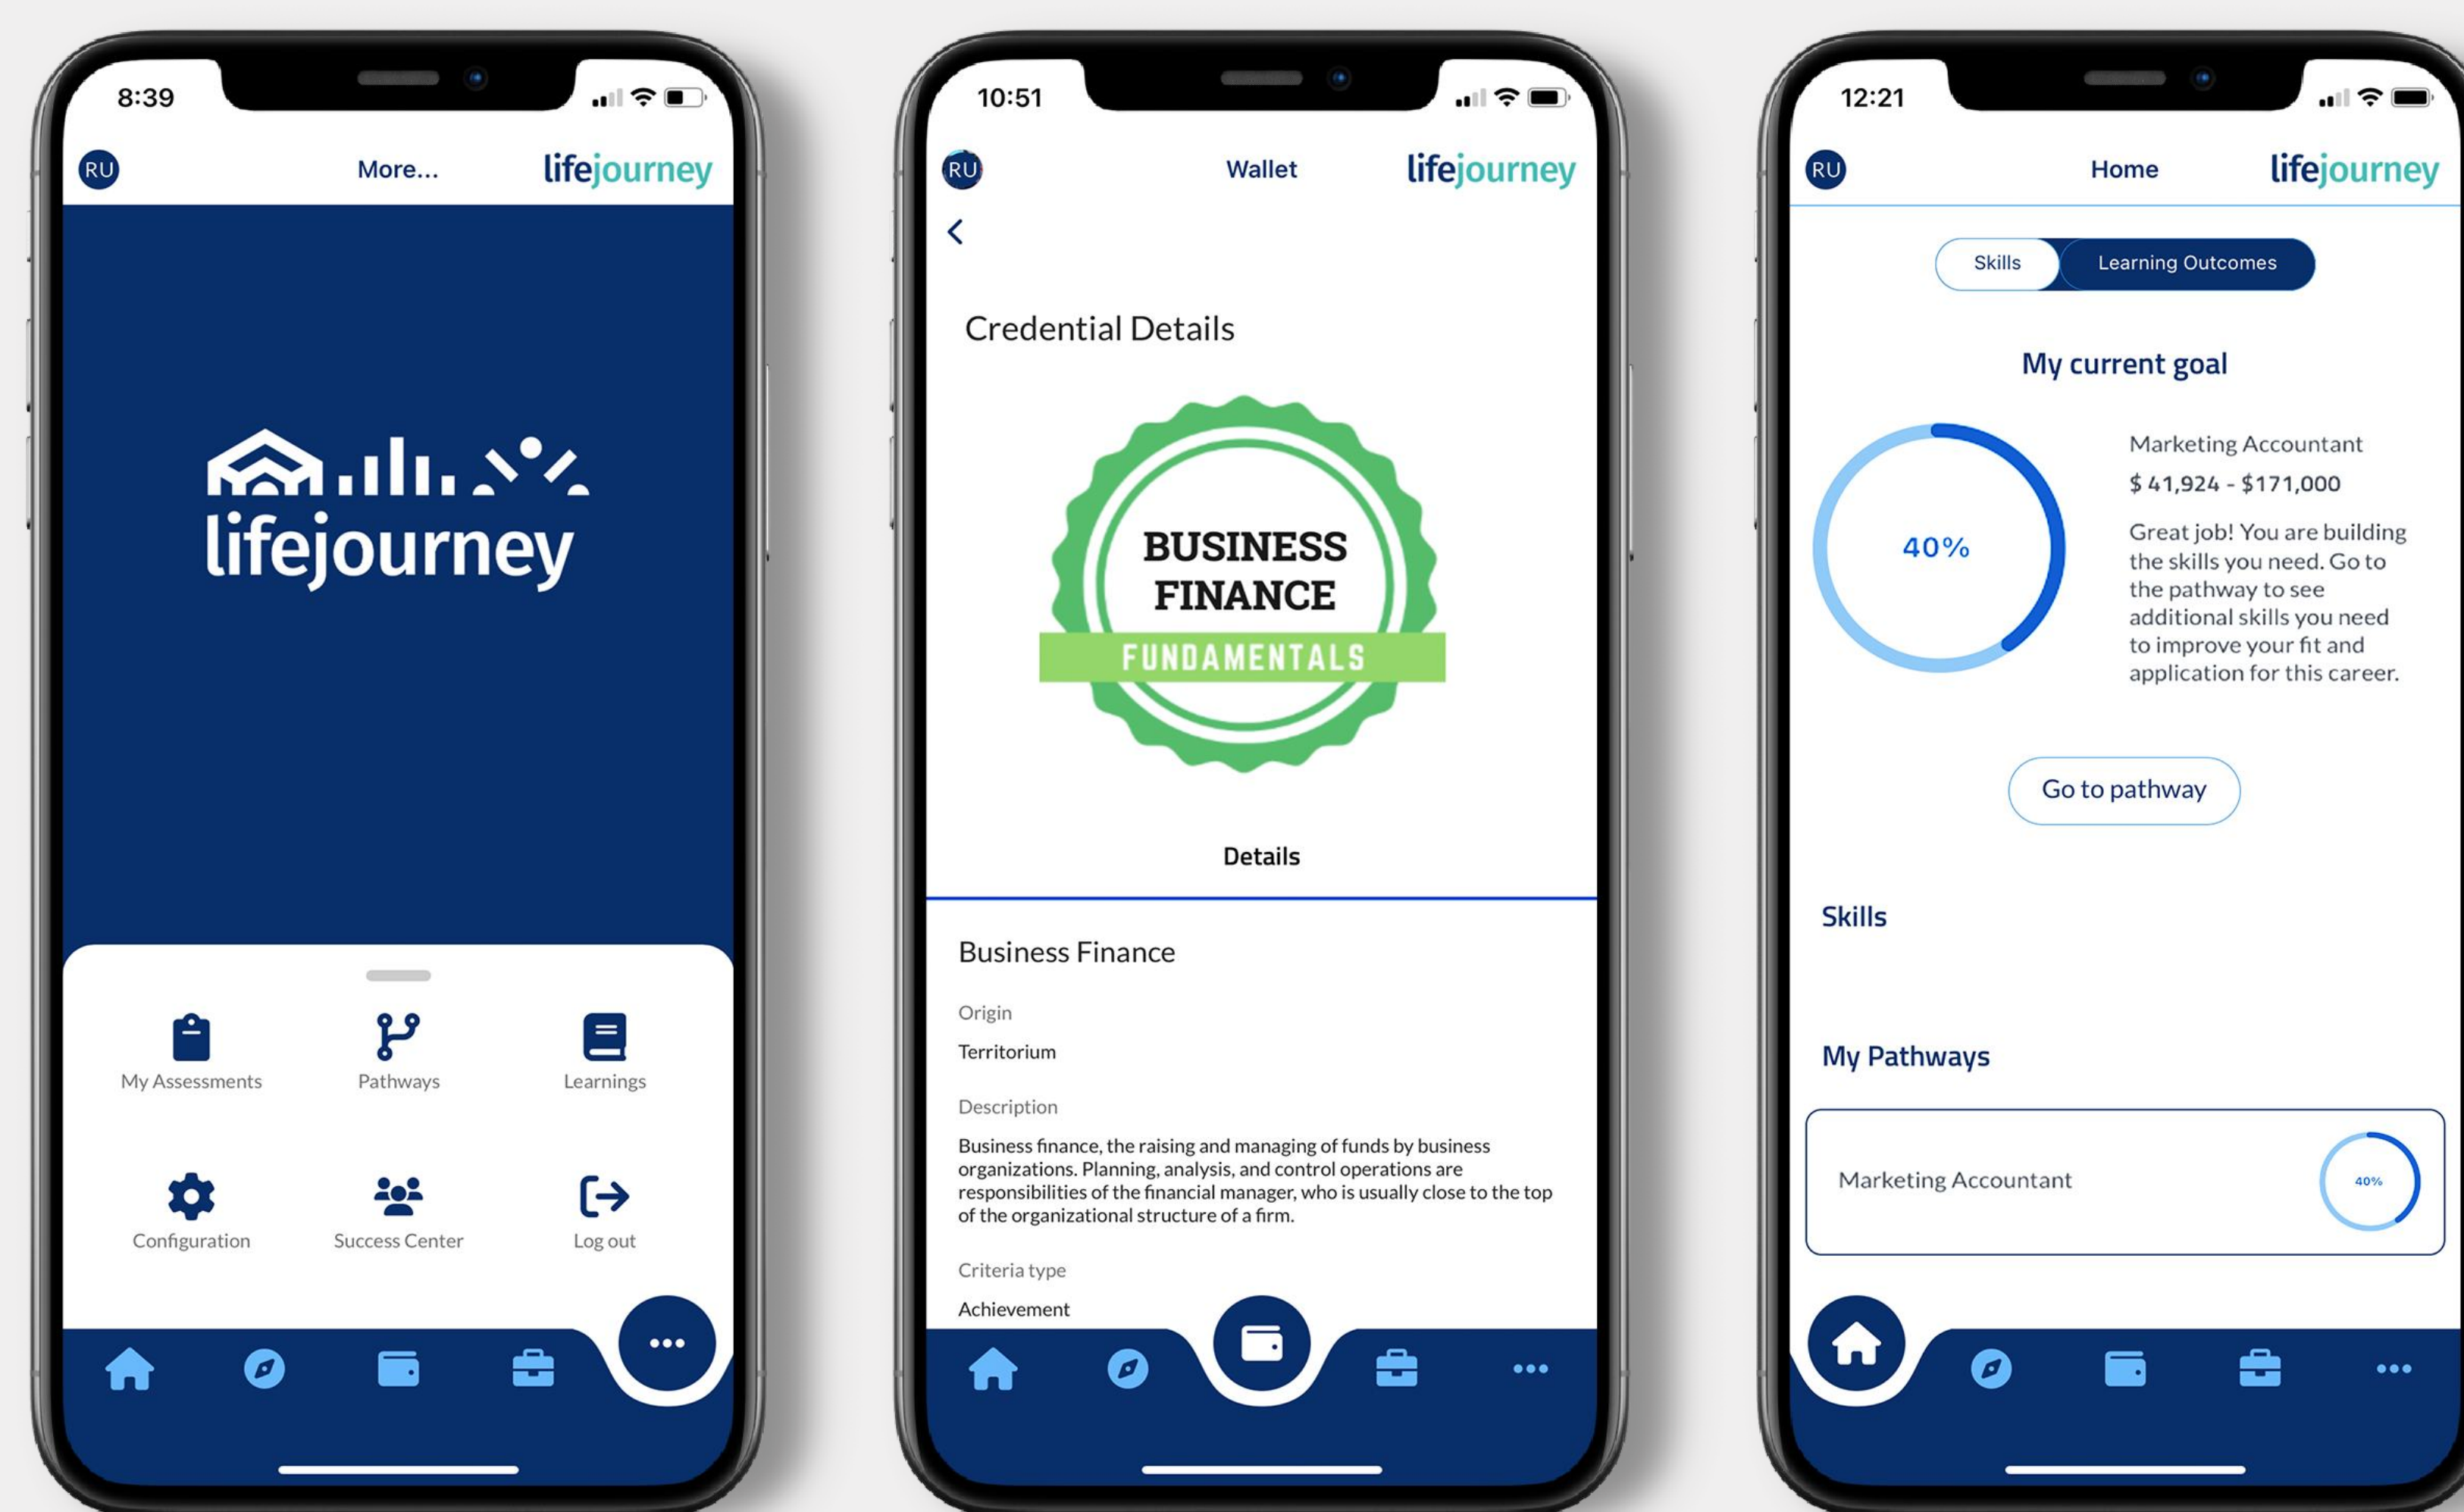

- Mapping and Measuring Learning Outcomes & Employability Skills
- Institution configurable in-depth reporting targeting learner's skill development
- Skills Digital Wallet and Employability Pathways to Real Jobs
- Stackable Achievements, Microcredentials and Badging
- Personalized Learning Pathways and Marketplace
- Engine for Prior Learning Assessment

Our secure and interoperable **CLR + digital credential wallet** enables learners to control their own credentials and pathways for life. This allows learners to explore many configurable methods to improve their lifetime earning power potential through additional education, workforce credentials, basic and soft skills assessments, and, ultimately, job placements.

A personalized mobile technology drawing upon verified skills, experiences, competencies and credentials for real jobs and employability readiness.

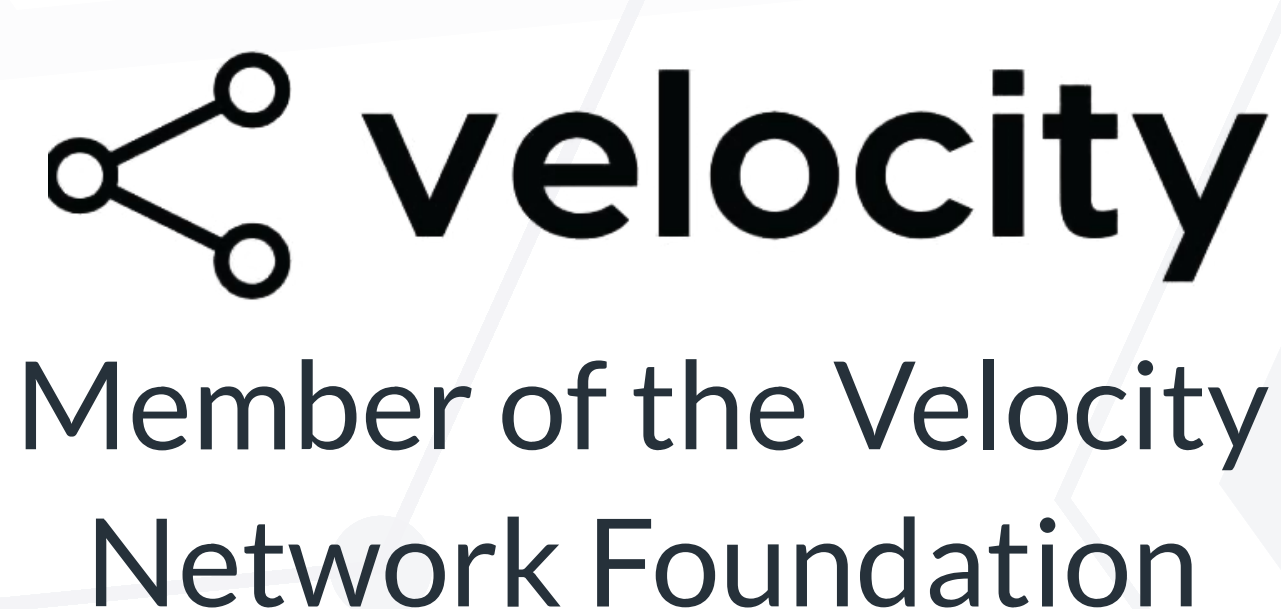

Using Territorium's LifeJourney app, students are empowered with a comprehensive learner record (CLR), a skills-first digital credential wallet, and AI-powered career pathways with job-matching technology.

Territorium's LifeJourney demonstrates the value of higher education in a skills-first economy that builds upon students' academic learning experiences and showcases their skills and preparedness for entering the workforce.

## LifeJourney benefits:

- **Recruitment:** Territorium's LifeJourney shows prospective students how specific degrees, tracks, and courses and the skills they acquire upon completion directly connect them to a best-fit job.
- **Retention:** Territorium's LifeJourney enhances the student experience by allowing students to access their learning-to-skills progression in real-time and how that directly relates to future employability.
- **Employment:** Territorium's LifeJourney guides students towards career paths and matches them to best-fit jobs based on what they learn and recommends learning pathways that help increase their readiness for entering the workforce.
